1. SCOPE:

SNIDER & CIA S.A.S., specialized in the storage of goods under customs control, national goods, inventory management, commercial user operations in free trade zones, and motor freight transportation services, its Senior Management, Process Leaders, and Collaborators are committed to supporting and implementing control measures for the prevention, mitigation, correction, and/or compensation of significant environmental impacts and risks. This includes compliance with environmental regulations and other applicable requirements, the allocation of necessary resources, and the strengthening of a sustainable culture, with the goal of preventing pollution generated by the provision of its services and protecting the environment for future generations. Furthermore, it integrates social responsibility as a mechanism for prevention and control to avoid labor abuse, discrimination, forced labor, child labor, and other violations of human rights, continuously improving sustainable performance and demonstrating a balance between the economic, social, and environmental pillars.

SNIDER & CIA S.A.S., in fulfillment of the Technical Norm ISO 14001:2015 establishes, implements and maintains its policy of Environmental Sustainability.

2. OBJECTIVES:

For the fulfillment and achievement of the Environmental Management System **SNIDER & CIA S.A.S.** has the following objectives

- Implement control measures to prevent, mitigate, correct and/or compensate significant environmental impacts and risks.
- Allocate financial, human, technological and infrastructure resources necessary for the maintenance of the Environmental Management System.
- Comply with environmental regulations and other requirements applicable to the organization.
- Strengthen the sustainable culture in the organization's collaborators.
- Implement a Corporate Social Responsibility program that promotes inclusion, works with different communities and is framed within the global Sustainable Development agenda.
